IN THE BEGINNING WAS

DuraPost® CLASSIC

Strong Lightweight Posts. Compatible With Practically Any Wooden Panel

The classic DuraPost® steel post changed the game in fence construction. Designed with both performance and practicality in mind, it blends strength with simplicity—offering a smarter way to build durable, long-lasting fences without the usual hassle.

Timber panel not included, ask Retailer

DIMENSIONS

Post is available in 4 lengths: 1.8m, 2.4m, 2.7m and 3m

Built To Last: Classic DuraPost® is strong, lightweight, and built to last.

Easy Handling: Light enough to carry and fit solo—no heavy lifting required.

Versatile: 'H'-shaped profile fits almost any panel or board type with ease.

Wind Resistant: Engineered to withstand winds up to 110mph once installed.

Finishes

Available in 4 powder coated colours and uncoated galvanised steel

BLACK
(RAL 9005)

ANTHRACITE GREY
(RAL 7016)

OLIVE GREY
(RAL 7002)

SEPIA BROWN
(RAL 8014)

GALVANISED

Swapping out our old wooden fence posts for DuraPost® CLASSIC was one of the best decisions we've made for our garden. The anthracite finish gives a really modern look, and even after some rough storms, they've held up brilliantly—no rust, no wobble. I managed the installation myself without any hassle, and the fact that they're maintenance-free is a huge bonus. They're strong, stylish, and built to last. Couldn't be happier!

— Helen M., Property Owner, Leeds

DuraPost® CLASSIC

IDEAL FOR BUILD ON SITE RAIL & SLAT FENCING

Build smarter fences with DuraPost®, the strong and stylish steel post.

When it comes to building rail and slat fencing on site, your choice of fence post can make or break the project. That's why professionals and homeowners alike are turning to DuraPost® the market leading steel fence post system that's redefining durability, style, and ease of installation.

Built To Last: Classic DuraPost® is strong, lightweight, and built to last.

Easy Handling: Light enough to carry and fit solo—no heavy lifting required.

Versatile: 'H'-shaped profile fits almost any panel or board type with ease.

DURAPOST®
THE SUSTAINABLE, ECO-FRIENDLY, DURABLE, FLEXIBLE, OPTION

DuraPost® IS ENDLESSLY RECYCLABLE

Comparison between DuraPost®, Timber and Concrete

Type	DuraPost® Classic Post	Concrete Slotted Post	Timber 4" Post
Average lifespan	25+ Years	15-25 Years	4-8 years
Recyclability	Endlessly recyclable	Not recyclable. If rebar can be separated this can be recycled.	Not recyclable
Wind Certified/Tested	Yes – 3rd Party Tested	No	No
Weight	7.1kg	44kg	13.5kg
Quality consistency	Precision engineered with QC checks by Birkdale	Variety of manufacturers and inconsistency	Varying growth time and supply and treatment issues
Delivery to site for 50 plots (833 posts)	5.9 Tonne	36.6 Tonne	11.2 Tonne
Carbon Impact (see carbon 2030 fig.1-3 for figures)	Made from recycled steel and endlessly recyclable	Heavy carbon impact. See concrete impact details.	Positive impact in growth but length of life and grave process has heavy impact.

DuraPost® Fencing

Introducing our innovative range of eco-friendly fence panels, crafted from durable composite materials and lightweight aluminium. Strong, stylish, and built to last, these new designs offer a sustainable alternative to timber without compromising on performance or appearance.

DuraPost VENTO®

Classic Style Composite Fence Panel

DuraPost VENTO® panels feature the timeless 'hit-and-miss' design, expertly crafted from sustainable rice husk plastic composite material. This ensures a durable, long-lasting fencing solution that combines aesthetic appeal with a low environmental impact.

DIMENSIONS

Multiple fence height options available

- **Iconic Design:** Classic 'hit and miss' style with a modern twist
- **Light & Easy to fit:** Designed by fencers for fencers
- **Selection of elegant colours:** To grace any outdoor space
- **Low Maintenance:** Looks fantastic season after season.

Natural wood texture finish available in 3 colours

CHARCOAL BROWN NATURAL

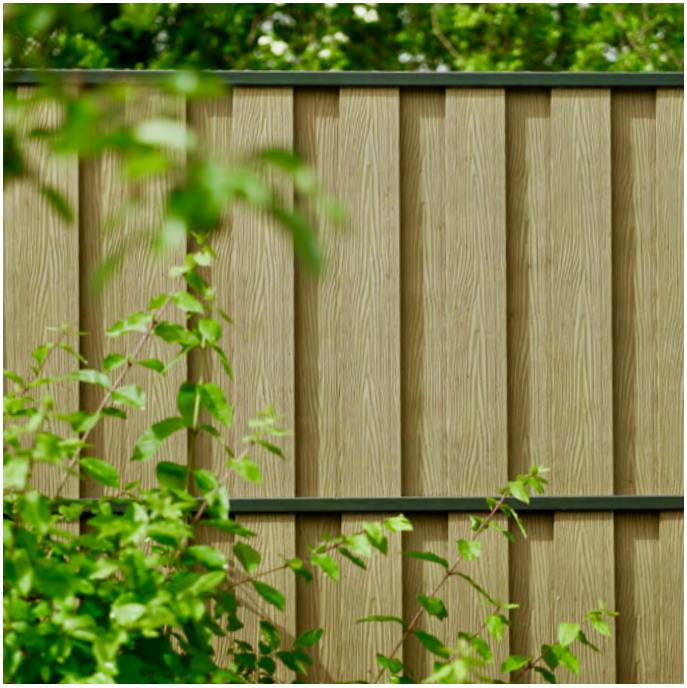

We recently upgraded our fencing with DuraPost VENTO® in the Natural finish, and it's completely elevated the look of our garden. The slatted design adds a modern, airy feel while still giving us the privacy we wanted. The natural colour blends beautifully with the greenery, and it's a refreshing change from the usual heavy timber panels. Installation was straightforward, and the panels feel really solid once in place. Best of all, they're low maintenance and made from recycled materials, which ticks the sustainability box for us. We've had loads of compliments from neighbours already!

— Sophie L., Homeowner, Buckinghamshire

DuraPost® is the greener fencing solution

Building a greener future, one fence panel at a time
At Birkdale, we're redefining fencing with sustainability at the heart of everything we do. While much of the construction industry has evolved, fencing has fallen behind, still relying on concrete and timber that often ends up in landfill or incinerated. We're changing that.

Sustainable by Design

- **Durable & Recyclable:** 100% recyclable, powder-coated, with a 25-year guarantee.
- **Made in Britain:** Much of our range is made in the UK, supporting jobs & cutting overseas transport.
- **PRIMA®:** Made with recycled content and fully recyclable at end of life.
- **URBAN® & VENTO®:** Use rice husks, reducing plastic use with bio-based materials.
- **Easy Integration:** 15-year guarantee and fits existing concrete posts—no removal needed.

Real Impact

For every 73m of DuraPost® fencing we install, we save 1 tree from being cut down and turned into timber fence posts.

To date, we've saved 2,431 trees—equivalent to 2.13 football fields

This not only reduces waste but also helps combat deforestation, a major environmental threat driven by industries like traditional fencing. By choosing DuraPost®, we're actively preserving forests, protecting biodiversity, and contributing to a more sustainable future.

Supporting Biodiversity

Back in the 1950s, the UK was home to around 30 million hedgehogs. Today, that number has sadly dropped to just 1 million. The main causes? Habitat loss, fragmented landscapes, road traffic, and intensive farming practices.

To help protect these beloved creatures, we've created a special hedgehog hole that fits seamlessly into any of our composite fencing panels, giving hedgehogs the freedom to roam safely between gardens.

You can make a real difference right from your own garden. By choosing a DuraPost® fence with a built-in hedgehog hole, you're helping to support local wildlife and giving nature a helping hand.

DuraPost PRIMA®

4x reinforce rods required per 6x6' bay

Composite Fence And Gravel Board

DuraPost PRIMA® is a versatile modular composite panel. It can be used as a tough and durable gravel board or easily stacked to create a stunning fence panel.

It is crafted with 70% recycled material that has high UV stability to preserve colour.

DIMENSIONS

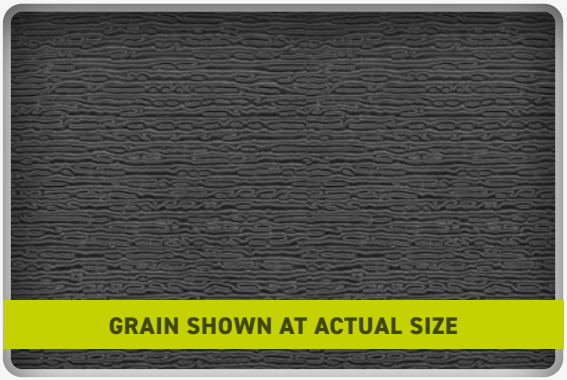

1830mm or 2400mm x150mm

- **Incredibly Versatile:** Use as a conventional gravel board or stack
- **Low environmental impact:** Made from recycled materials
- **Selection of elegant colours:** To grace any outdoor space
- **Low Maintenance:** Looks fantastic season after season.

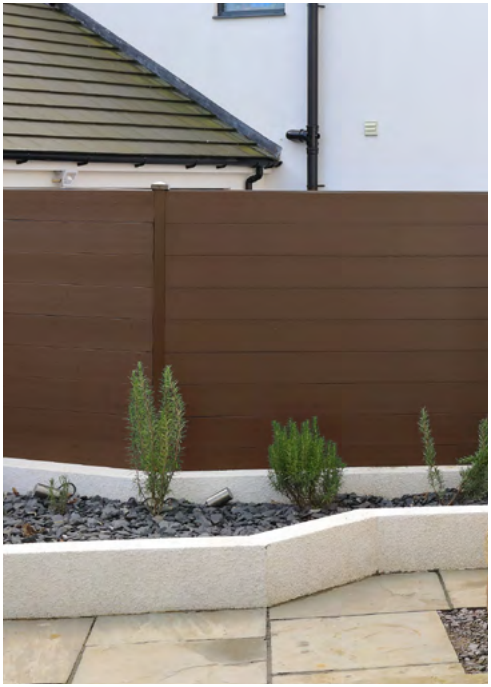

Subtle wood texture finish available in 5 colours

BLACK | ANTHRACITE GREY | SEPIA BROWN | OLIVE GREY | LIGHT GREY

DuraPost PRIMA® gave our garden a clean, modern finish that really stands out. The boards slot together easily, and the whole fence went up in no time. It looks great and feels built to last—no painting, no fuss.

— Danielle H., Homeowner, Kent

EASIER TO FIT
THAN TRADITIONAL POSTS

THE DURAPOST® SYSTEM IS DESIGNED TO BE INSTALLED BY ONE PERSON

With DuraPost®, it's never been more straightforward to fit your fencing. If you're using pre-made panels, simply dig the hole and set your first DuraPost® in with FENCEMATE® Post Concrete. Secure your gravel board into position with colour-matched screws, then slot your pre-made fence panel to the DuraPost® and screw into place. Next, position the second DuraPost®, check the alignment and then set with Post Concrete. Job done!
